

A unified approach
to rationalising your energy use

GDF SUEZ is already present, at your side, in 11 countries across Europe.

Your dedicated Key Account Manager is your day-to-day local contact and is committed to finding the most relevant and competitive solution to meet your company and sector, he or she can assemble innovative solutions designed to boost your performance.

For pan-European companies, a dedicated Lead Key Account Manager coordinates with your team assuring an integrated purchasing policy adapted to your global and local requirements.

Meeting the greatest
energy challenges together

For large enterprises in Europe

A dedicated energy partner for large enterprises in Europe

Energy is an essential component for your company from an economic, technical and environmental viewpoint. We've created GDF SUEZ Global Energy to provide you with tailor-made sustainable solutions that match your company's needs in this field.

As a leading company, we are able to leverage our in-depth knowledge of local markets while helping you to manage your energy on a global scale.

By achieving an integrated vision of your energy requirements and use, you'll be better able to implement the sustainable, energy efficient

solutions that keep you competitive and help preserve our environment.

Our portfolio of value-added services is designed to help you optimise energy at every level, through our tailor-made pricing solutions, risk management and proactive information services to a range of renewable energy options and locally driven projects.

More than a provider of custom solutions, you'll discover an organisation uniquely adapted to your specific requirements and to the issues you face as a large-scale energy user.

Customized solutions to meet your specific needs

GDF SUEZ Global Energy delivers customized solutions that reflect your unique energy requirements and which are tailored to your priorities. Whether you are operating in a single location, or have sites spread across Europe, you'll have access to these unique advantages:
